This experience gives you an introduction to Tactical Fighter Manuevers using the actual skills taught to current military fighter pilots. After being fitted with a full flight suit and completing the air combat briefings you'll climb into the fighter aircraft alongside your instructor. With your hands on the controls you will engage in five to six combat engagements. Your flight will be recorded on video-tape and reviewed in a flight debriefing and we'll even give you a copy to take home at the end of your amazing day.

The instructors, both military and civilian, have enviable credentials. Most are former military fighter pilots from the Air Force, Navy and Marine Corps, and several are graduates of Red Flag and the Navy Fighter Weapons School. This fighter pilot experience features SIAI Marchetti SF-260 and Extra 300L propeller planes, the types used by the military in training their fighter pilots and so it will give you the best experience. With 260-300hp, they are capable of airspeeds up to 236 knots, +6 G-forces and are highly maneuverable giving you the most realistic air combat and fighter pilot experience available.

Restrictions: Pilots must weigh less than 250 pounds and stand no taller than 6' 7".

Things to know: There are just two participants in each class. Since you will be suited up in a flight suit for this activity, you may wear whatever is comfortable for the air temperature. We suggest rubber-soled shoes (i.e. tennis shoes work well). Get a good night's sleep and avoid an overabundance of alcohol the night before your flight. Guests may sit in on the briefing and watch as you take off and land. Missions are conducted approximately 25 miles from the airfield so guests will be unable to view the actual flight. The instructor will fly the plane during take-off and landing.
